H/S Catheter Set
For Hysterosonography and Hysterosalpingography

PRODUCT NO. 61-5005
Flexible, radiopaque catheter, 5F, 30cm working length. Closed, rounded distal tip with side hole proximal to the tip. A non-latex balloon of 1.5cc capacity is mounted proximal to the side hole. The proximal end is bifurcated into one extension tube for balloon inflation and a second one for contrast or saline injection. Includes a 1.5cc controlled delivery syringe for proper balloon inflation. Intended for women who have not previously been pregnant.

PRODUCT NO. 61-5007
H/S Catheter Set, same as 61-5005 but 7F size with balloon capacity of 3cc. Includes a 3cc syringe. Intended for women who have previously been pregnant.

PACKAGING
Packed sterile in straight peel-pouch. 10 per box, 40 (4 boxes) per case.
